

Community Sacred Fires and Potlucks

We begin the evening with a potluck where we have an opportunity to socialize, get to know each other and connect. After the potluck we gather around the fire, make offerings and be together in a sacred space. Here, we provide an opening to connection to each other and our hearts with the help of the primordial essence of fire. Making offerings is optional for everyone.

Humans have been sitting around the fire since the beginning of time. Fire provokes our ability to open up so we can express, connect, share and heal. All traditions, beliefs and paths have fire at the center, and each of these ways are welcome here. Come to the fire and experience its warmth while everyday stress and concerns melt away, and hearts open.
